Heroku

Projects

Restaurant Roulette (5 day solo project)

• By simply entering a location and their food preferences, indecisive individuals can use Restaurant Roulette to simplify the process of selecting a restaurant.
• Technologies used: Ruby, Sinatra, Yelp API, jQuery, Bootstrap, ActiveRecord, HTML, CSS
• Major functionalities are performed on one page through AJAX

SwipeSee (8 day team project)

• SwipeSee allows users to view a curated list of some of the world's most popular tourist attractions organized by cities. As a mobile first web application, SwipeSee main focus was providing a user-friendly interface.
• Technologies used: Ruby, Ruby on Rails, jQuery Mobile, jQuery, Javascript, Rspec, Capybara, HTML, CSS, Postgres, Kimonolabs, Bing & Google APIs

RoadTripper (2 person project - SFO Travel Hackathon 6/13/15 - 6/14/15)

• RoadTripper was built as a platform to allow hitchhikers to connect with drivers on long distance road trips.
• Technologies used: Ruby, Ruby on Rails, JavaScript, HTML, CSS, Postgres, Bootstrap

Employment

Dev Bootcamp

Recent Graduate   Dec 2014 to May 2015

• Graduated from Dev Bootcamp, a 19-week intensive web development program
• Learned the fundamentals of computer programming: Ruby, Ruby on Rails, JavaScript, jQuery, algorithms, HTML, CSS, object-oriented design, Git, and agile and test driven development
• Built web applications in Ruby and JavaScript using MVC and object-oriented design patterns
